

PETER MEEHAN

<https://22a.ie> · [GitHub](#) · [LinkedIn](#)

A software engineer with a penchant for frontend web technologies – I enjoy building things that delight and enabling organisations to do the same at scale. The best way to contact me is via LinkedIn - if you're a human that has read this document, please feel free to include the word *Turnip* in your message.

Education

B.A.(Mod.), Computer Science

Trinity College Dublin, 2017, First Class Honours.

Experience

Staff Product Engineer, *Intercom*, Dublin

Mar 2025 - Present

Frontend Technologies.

Leader & domain expert responsible for strategic direction, prioritisation, and outcomes of our frontend technologies. Consistent, org-wide impact both as expert executor and by leveraging impact through others. Passionate about engineering standards, quality, and helping peers grow. Comfortable with ambiguity. Highly effective at communicating tradeoffs to audiences at different zoom-levels.

Senior Product Engineer, *Intercom*, Dublin

Apr 2021 - Mar 2025

Datastores, Core Technologies, Frontend Technologies.

Enabled teams to ship better product faster through ownership and operational excellence of core frontend technologies. Maintained core languages, frameworks, and patterns to enable product teams to focus on solving customer problems. Parachuted into product teams for domain expertise on occasion but most energised by the multiplicative impact of improving efficiency across hundreds of engineers.

Product Engineer, *Intercom*, Dublin

Apr 2018 - Apr 2021

Design Systems, Developer Infrastructure.

Built reusable components, patterns, supporting tooling, and live documentation systems to accelerate iteration and product development lifecycles. Conducted developer productivity surveys and prioritised improvements in build, test, deploy workflows. Owned end-to-end migration of internal package release system. Drove and coordinated in-place migration and consolidation of frontend overlay libraries.

Software Engineer, *PageFair*, Dublin

May 2017 - Apr 2018

Ad-tech industry, shipped code to billions of pageviews per month. Designed, built, and provisioned infrastructure for core services. Optimised existing infrastructure for cost savings and fault tolerance.

SEO

Comfortable in a *nix shell, strong proponent of hygienic version control.

Recent professional experience with: Typescript, Javascript, Ember.js, React, HTML, CSS, Tailwind CSS, build&runtime performance analysis&optimisation.

Rusty professional experience with: Rails, Ruby, Phoenix, Elixir, Scala, AWS.
